**FOR IMMEDIATE RELEASE**

**SIG SAUER® CLASSIC PISTOLS NOW IN .22 LR**  
*The Most Respected Name in Pistols*  
*Adds Versatility in its Classic Lineup*

**EXETER, NH** – [SIG SAUER, Inc.](http://SIGSAUER.com), the leading manufacturer of commercial, law enforcement, and military firearms, has added to their popular series of Classic centerfire pistols new .22 LR Rimfire models. The same P220®, P226®, and P229® that have been used by civilian, law enforcement, and military personnel the world over, can now have these same models factory built in .22LR. The SIG SAUER® Classic .22's are built on the same frame as their centerfire counterparts.

All three Classic .22's feature the same SIG SAUER Four-Point safety system which employs a decocking lever, a patented automatic firing pin safety block, a safety intercept notch, and a trigger bar disconnector. The new machined slides also feature a front sight adjustable for drift and a rear sight adjustable for both windage and elevation.

With the purchase of a new SIG SAUER Classic .22 shooters can now enjoy hours of serious training at the range for a fraction of what they would pay practicing with full recoil centerfire rounds.

SIG SAUER Classic .22's are shipped in a lockable case with one 10-round magazine. The MSRP for the Classic P220, P226 and P229 is \$608.00.

The new SIG SAUER X-CHANGE Kit™ is the perfect accessory for your SIG SAUER Classic .22 rimfire pistols. Now shooters can add SIG SAUER centerfire performance with just the change out of the slide assembly, barrel, recoil system, and magazine to any of the standard production pistol calibers; 9mm, .40 S&W, and .357SIG. Exchanging components does not alter the reliability or accuracy of either assembly.

Owning a SIG SAUER Classic .22 and a centerfire X-CHANGE Kit provides the added benefit of owning two pistols in a single premium package. More shooting at a lower cost with the full size SIG SAUER pistol you're accustomed to; the SIG SAUER Classic .22 caliber pistols that now include the option for centerfire performance with a SIG SAUER X-CHANGE Kit.
