FOR IMMEDIATE RELEASE

THE SIG SAUER® P238™ ACP
Classic Styling in a Concealable Package

EXETER, NH – [SIG SAUER, Inc.](http://www.sigsauer.com), the leading manufacturer of commercial, law enforcement, and military firearms, proudly introduces the P238, in .380 ACP; specifically designed as a concealed carry or backup handgun for legally armed citizens or law enforcement professionals.

Reacting to many requests from the marketplace for a subcompact [SIG SAUER](http://www.sigsauer.com) pistol, engineers designed the new P238 as a smart looking, small handgun built with the same accuracy and reliability as large frame [SIG SAUER](http://www.sigsauer.com) pistols. With an overall length of just 5.5 inches a height of 3.96 inches, and weighing just under a pound, the [SIG SAUER](http://www.sigsauer.com) P238 is the ultimate firepower in an all metal frame concealed pistol. The P238 is built on an anodized alloy beavertail style frame with fluted aluminum grips for comfort and a secure hold during rapid-fire usage. The stainless steel slide features the popular [SIG SAUER](http://www.sigsauer.com) slide serrations and improves overall performance and accuracy. Additionally, the contrast or SIGLITE® Night Sights are removable and adjustable for windage. The sear and trigger return spring are redesigned to prevent spring over-ride of the ejector during assembly. Two finishes are available; Two-tone and corrosion resistant Nitron®. The new [SIG SAUER](http://www.sigsauer.com) P238 is shipped in a lockable hard case with one 6 round magazine at an MSRP starting at \$515.00 for the Nitron® with contrasting sights. For more information, log on to www.sigsauer.com.
